A short list of references are presented here, they are referred as selected references for further reading. Those reference are not for obligatory reading but students interested on more deeply understanding of each topic treated on Electro-technology can found those references very interesting and useful in their future working life as engineers.

A personal library is a very good investment for future, if you feel that you would like to keep you library with a very section of Electro-technology these references are for you.

The following list of references would be very useful:
